CAREER OBJECTIVES

Full-stack web developer with 4 years of experience shipping production applications in Laravel and Next.js across ERP, travel & hospitality booking, e-commerce, and education platforms. Delivered 45+ projects — as an in-house developer at Softcreation Ltd. and, currently, PnH Corporation, and as a freelancer for international clients on Fiverr and Upwork. Comfortable owning a project end to end, from database schema and third-party API integration through to deployment on cPanel, AWS, and Docker, backed by hands-on SEO skills — keyword research, on-page and technical optimization, and competitor analysis — to ship products that are built to be found. Looking to bring this hands-on, delivery-focused experience to a team building ambitious, high-traffic web products.
